

COVID-19 Precautions Between Times Pharmacy and the Clinic Site

Times Pharmacy wants your employees to be safe during this COVID19 crisis while we administer flu vaccinations. Here are some measures that we can all take to ensure safety during our clinics:

Clinic Site

Please provide a convenient area or room for our pharmacists to administer vaccinations. Please ensure that there's enough space for employees to be 6 feet apart if a small line forms during the clinic.

Please fill out our appointment sheet in advance for your clinic. This will assist with spacing out your employees throughout the entire clinic time and is an extra precaution to preserve patient safety.

Please have your employees wear masks and abide by CDC social distancing guidelines to protect yourselves against COVID19.

Please have your employees completely fill out both the COVID-19 Screening Form and the Flu Vaccination Consent Form prior to the clinic.

Times Pharmacy

Employee temperature will be measured by our Wellness Assistant(s) and will be recorded on the top portion of our COVID-19 Screening Form.

Times Pharmacy will provide personal protective equipment such as masks and face shields for our Pharmacist(s) and Wellness Assistant(s).

Times Pharmacy will sanitize the vaccination area before and after the clinic.

Our pharmacists will change gloves and use hand sanitizer after every patient.

Our staff will periodically clean and disinfect frequently touched objects and surfaces.

Thank you for having Times Pharmacy at your site! Let's make our collaborative flu vaccination clinic a safe and pleasant experience for everyone!
